ABOUT ARDEX

INTRODUCTION

ARDEX GROUP

The Burj Khalifa, Dubai, UAE.

For more than 70 years, ARDEX has been the quality leader for an entire industry, offering engineered products and systems in the areas of: floor levelling and adhesives, tile and natural stone systems, sheet and liquid applied waterproofing membranes, general construction and decorative surfaces.

ARDEX system solutions have been making buildings better all over the world. From the Burj Khalifa in Dubai, the London Olympic Aquatic Centre, the Sydney Opera House and commercial and residential projects big and small. ARDEX systems provide reliability and support that are always tailored to the specific requirements of the project.

Strong growth and intelligent acquisitions in foreign and local markets enables the ARDEX Group to draw from a global pool of resources. This allows ARDEX to ultimately supply complete system solutions which include market leading, high quality products and services to its valued customers.

As one of the leading building material manufacturers, the ARDEX Group is represented in over 100 countries.

ARDEX VISION

“The ARDEX Group is the leading solution and service provider of innovative building systems.”

Family owned company with people of integrity that are engaged and empowered

Customer centricity via direct end user engagement

Diversifying our products, services and channels including via digital platforms

Enhancing production, quality control and product development through digital technologies

Sustainability in our processes and solutions fostering social responsibility

Unique and efficient building and construction systems through agile innovation

ARDEX AUSTRALIA – COMMITTED TO THE LOCAL MARKET

- Localised Research and Development – Formulations designed in Australia for Australian conditions
- Five local manufacturing sites – Products made close to market
- Seven distribution centres – Products available when you need them
- Local Technical Team – Support and backup wherever you are
- Customer service and sales support in every state

ARDEX AND OUR ENVIRONMENT

As part of our ongoing commitment to the environment, ARDEX is constantly looking to employ best environmental practices, whilst also developing new and existing products to reduce our ecological footprint.

Utilising recycled rubber in place of sand for manufacturing a range of products is one of the ways ARDEX achieve this. By doing so, ARDEX not only contributes to the recycling of approximately 250,000 used tyres per year, but also saves approximately 3500 tonnes of Australia's sand per year.

The indoor air quality of buildings is also enhanced by using ARDEX products. The performance leading and most commonly used ARDEX products have been tested to the Green Building Council Green Star Specification for Office Design (IEQ-11) and Office Interior (IEQ-13). ARDEX products that meet the benchmark for VOC credit in the Green Building Council of Australia's Rating Tools are marked with the following icon within this product catalogue.

LOW VOC 

TECHNICAL SUPPORT INFORMATION

ARDEX is committed to being the leading provider of technical support in the field. We believe our responsibility does not end with the manufacture of innovative, technically superior products. Therefore, our team of technical advisers works with contractors and specifiers, as well as with the ARDEX R&D team to provide solutions for specific applications. Some of these common solutions are published in ARDEX Technical Bulletins which are on the ARDEX Australia website.

Some examples include:

- Tiling over timber
- Tiling with underfloor heating systems
- Fixing moisture sensitive stone

Contact our Technical Services department for help with anything out of the ordinary, if we don't already have the answer we will certainly investigate.

Technical Services Toll Free

1800 224 070 (Australia)

0800 227 339 (NZ)

Technical Data is available on the ARDEX

Website www.ardexaustralia.com and the ARDEX Australia mobile app.

ARDEXacademy

TRAINING EXCELLENCE

The building industry, like any other, requires on-going training to keep up with the changes in legislation/ standards and materials (tiles, concrete, substrates etc). ARDEX offers training for applicators as well as distributors and retailers of ARDEX product. The idea of the ARDEXacademy is to permanently share knowledge and expertise with customers.

Training is carried out by an ARDEX team of technical experts who have extensive knowledge and practical experience of the tiling, flooring, waterproofing and general construction industry. There are many courses available both on site at the state of the art ARDEX Academies, or virtual training via ARDEX Academy Online. Visit the training page at www.ardexaustralia.com for more information and to register. There are various courses available such as:

- ARDEX Undertile Liquid Waterproofing Accreditation Training
- ARDEX Floor Levelling Training
- ARDEX Undertile WeldTec Installation Training
- ARDEX Epoxy Grout Training
- ARDEX Retail Tile Training
- ARDEX Large Format Thin Porcelain Tile Panel Installation

24/7 RESOURCES

ON-DEMAND SPECIFICATION TOOL

The ARDEX Specification Tool provides on-demand system solutions for waterproofing, flooring, remedial or tiling scenarios. Simply answer project specific questions and a complete system recommendation, including products and application methods, are provided for immediate download.

TILE ADHESIVE SELECTOR

This selector takes the guesswork out of choosing the best tile adhesive based on tile types and project substrates.

GROUT COLOUR SELECTOR

Visualise how ARDEX grouts match up to the colours of your chosen tiles by using the ARDEX online Grout Colour Selector.

PRODUCT CALCULATORS

Never be caught short again. Find out the amount of material you will need for your project by using the instant online Product Calculator.

RESOURCES

From quick reference specification sheets, to product information papers and technical bulletins, ARDEX has a range of online resources designed to help you, no matter the size of the project.

SYSTEM ARDEX

ARDEX is committed to developing products that are easy to use and offer high performance. ARDEX products are designed to work together for total reliability and performance. Each product is the careful result of research and development combining the input of contractors, specifiers and installers to ensure absolute product compatibility backed by a guarantee. This is System ARDEX.

TECHNICAL SUPPORT

ARDEX products are backed by a team of Technical Support Specialists and Field Professionals dedicated to one goal – eliminating guesswork, improving onsite efficiencies and taking risk out of product and system installation.

ARDEX is committed to providing the highest level of technical support – from product training to customised system recommendations.

ARDEX have a dedicated team of technical experts to help you at any stage with:

- System recommendations
- Onsite assistance and demonstrations
- Complaint investigation

WARRANTY AND QUALITY ASSURANCE

ARDEX products are generally warranted for 10–20 years when installed to relevant Australian Standards and applicable ARDEX specifications, technical data sheet and instruction for application and use.

The ARDEX Australia Guarantee or Warranty covers the:

- **Repair or replacement of the product PLUS;**
- **The costs of re-installation of the product PLUS;**
- **The costs of replacement of any immediate covering such as tiles or carpet.**

Product Warranty

A Product Warranty is applicable on all ARDEX products for a period of between 10–20 years depending on the product. ARDEX warrant that their manufactured product is free from defects as well as being suitable for the purpose for which it is intended, that is as long as it has been applied in accordance with the ARDEX published literature.

System ARDEX Warranty

The System ARDEX Warranty is project specific and warrants that the System ARDEX combination of products that forms the total system are free from defects, are 100% compatible and the system combination is suitable for the purpose intended. The System ARDEX Warranty is designed for applications involving multiple ARDEX products that form a system for a particular purpose. For example, floor surface preparation prior to laying vinyl may include up to five different ARDEX products and the total System ARDEX combination would be warranted as being free from defects, totally compatible and suitable for a particular project application.

Extended Warranty

For an extended warranty or one that includes an installation of non-standard product combinations (e.g. product combinations that are not detailed in our published data sheets) you need to contact the ARDEX Technical Services Department on 1800 224 070 prior to the installation for our best recommendations.

ADHESIVE AND GROUT CLASSIFICATION

The aim of the system is to provide a guideline for tile adhesive and grout performance. The standard provides parameters for which tile adhesives and grouts are tested to, depending on their performance they can be granted specific classifications.

Tile adhesives are defined in three types, these are:

- C** – Cementitious adhesive
- D** – Dispersion adhesive
- R** – Reaction adhesive

Each type of adhesive can potentially have additional characteristics, which fall under the following classes:

- 1** – Normal adhesive (standard strength tile adhesive)
- 2** – Improved adhesive (stronger tile adhesive)
- F** – Fast setting/drying adhesive (with minimum tensile strength of 0.5mPa within 6 hours)
- T** – Slip resistant adhesive (with minimum tensile strength of 0.5mPa within 6 hours)
- E** – Adhesive with extended open time (once spread, the adhesive can be left without a tile being fixed for a longer time)
- S** – Special deformable characteristic, for cementitious adhesives only (degree of flexibility of the adhesive, either S1 – flexible or S2 – highly flexible)

Tile grouts are defined in two types, these are:

- CG** – Cementitious grouts
- RG** – Reaction resin grouts

Note: It is the responsibility of the contractor to check ISO 13007 for amendments.

Each adhesive can therefore be classified under one of the following designations in the table:

Adhesive Type	Class/ Characteristics	Description
C1		Normal cementitious adhesive
C1	F	Fast setting cementitious adhesive
C1	T	Normal cementitious adhesive with slip resistance
C1	FT	Fast setting cementitious adhesive with slip resistance
C2		Cementitious adhesive with improved characteristics
C2	E	Cementitious adhesive with improved characteristics and extended open time
C2	F	Fast setting cementitious adhesive with improved characteristics
C2	T	Cementitious adhesive with improved characteristics and slip resistance
C2	TE	Cementitious adhesive with improved characteristics, slip resistance and extended open time
C2	FT	Fast setting cementitious adhesive with improved characteristics and slip resistance
D1		Normal dispersion adhesive
D1	T	Normal dispersion adhesive with slip resistance
D2		Dispersion adhesive with improved characteristics
D2	A	Fast drying dispersion adhesive with improved characteristics
D2	T	Dispersion adhesive with improved characteristics and slip resistance
D2	TE	Dispersion adhesive with improved characteristics, slip resistance and extended open time
R1		Normal reaction resin adhesive
R1	T	Normal reaction resin adhesive with slip resistance
R2		Reaction resin adhesive with improved characteristics
R2	T	Reaction resin adhesive with improved characteristics and slip resistance
CG		Normal cementitious grout (CG1)
CG	F	Fast-setting grout (CG1F)
CG	A	Normal cementitious grout with high abrasion resistance (CG1A)
CG	FA	Fast-setting grout with high abrasion resistance (CG1FA)
CG		Cementitious grout with improved characteristics (CG2)
CG	F	Fast-setting cementitious grout with improved characteristics (CG2F)
CG	FA	Fast-setting cementitious adhesive with improved characteristics and high abrasion resistance (CG2FA)
CG	FAW	Fast-setting cementitious adhesive with improved characteristics, high abrasion resistance and reduced water absorption (CG2FAW)
RG		High performance reaction resin grout (RG)

Note: Additional designations may be inserted according to the combination of the different symbols of the characteristics, e.g. C2 FTE S1 fast setting deformable cementitious adhesive with improved characteristics, slip resistance and extended open time.

Some ARDEX adhesives, such as ARDEX X 77, exceed the above standard classifications and have achieved unique classifications.

These have been independently tested by MPA Dortmund, Germany and are highlighted below:

- E(E)** – double the open time of standard E type adhesives
- T(T)** – double the slip resistance of standard T type adhesives

WHAT IS MICROTEC TECHNOLOGY?

A unique binding matrix made up of exclusive ARDEX materials, special cements and polymers combined with high performance fibres which improves adhesive strength, reduces the effect of shear strain and stress on the tiling system.

WHAT IS ARDURAPID?

ARDURAPID technology chemically utilises the mix water in building a reinforced crystalline structure guaranteeing a shrinkage free high strength system and virtually eliminating the risk of water staining.

Products with ARDURAPID Plus will include the added benefit of being able to be used externally.

High coverage ARDEX products cover larger surface areas with less material, which cuts down on processing, transport and packaging waste.

CHOOSE
YOUR
SOLUTION

CHOOSE YOUR SOLUTION

ARDEX offers a complete product offering, enabling customers to choose the right product based on their specific needs. From entry level products and workhorses through to benchmark premium products, solutions for all price and performance requirements are available.

TILING SYSTEMS

ARDEX provides intelligent and trusted system solutions for every aspect of tiling, from mosaic to large format tiling. For tile and natural stone installations – indoors and outdoors – domestic and commercial projects, ARDEX tile and stone installation systems include products for levelling and preparing difficult substrates, under tile waterproofing, a range of liquid and sheet membranes, tile adhesives, cement and epoxy grouts, silicones, sealers and cleaners.

PREMIUM POLYMER MODIFIED FLEXIBLE TILE ADHESIVE

ARDEX X78

LOW VOC

MICROTEC
TECHNOLOGY

ARDEX X78 is a high performance, fibre reinforced, polymer modified floor tile adhesive, formulated with Microtec Technology. It has double extended open time and non lipping capabilities, making it the only choice for heavy, large format floor tiles.

- Water and frost resistant
- Reduced chance of efflorescence due to the addition of special additives

TILE TYPES

Fully vitrified and ceramic tiles, porcelain, concrete stone tiles e.g. terrazzo, natural stones (excluding moisture sensitive), glass and porcelain mosaics.

SUBSTRATES

- Cement render/screeds, concrete
- Fibre-cement sheet, compressed fibre-cement sheet, plasterboard
- ARDEX liquid applied undertile waterproofing membranes
- Existing ceramic tiles after skim coat if glaze not removed in internal wet areas
- Autoclaved Aerated Concrete (AAC)

LOCATION

Internal, External
(Suitable for swimming pools and immersion applications)

PREMIUM MICROTEC FLEXIBLE WALL AND FLOOR TILE ADHESIVE

ARDEX X77

LOW VOC

MICROTEC
TECHNOLOGY

ARDEX X77 is a high performance, fibre reinforced, polymer modified wall and floor tile adhesive, which has been specially formulated with Microtec Technology to give exceptional properties of adhesion.

- E(E) achieves up to double the extended open time of E class adhesives
- T(T) achieves up to double the slump resistance of T class adhesives
- More secure tiling system with Microtec Technology

TILE TYPES

Fully vitrified and ceramic tiles, porcelain, concrete stone tiles e.g. terrazzo, natural stone (excluding moisture sensitive), glass and porcelain mosaics.

SUBSTRATES

- Concrete, renders, screeds
- ARDEX liquid applied undertile waterproofing membranes
- Fibre-cement sheet, plasterboard walls

FIBRE REINFORCED FLEXIBLE NON SLUMP WALL & FLOOR TILE ADHESIVE

ARDEX X18

LOW VOC

ARDEX X18 is a superior white polymer fortified cement-based wall and floor tile adhesive that has been specially formulated with mastic type properties. It contains specially developed fibres that add strength to the tiled area.

- Excellent workability with low sand content
- Fibre reinforced for extra strength
- Extended open time

TILE TYPES

Fully vitrified and ceramic tiles, porcelain, concrete stone tiles e.g. terrazzo, mosaics, natural stone (excluding moisture sensitive).

SUBSTRATES

- Concrete, renders, screeds
- ARDEX liquid applied undertile waterproofing membranes
- Fibre-cement sheet, plasterboard walls

FLEXIBLE NON SLUMP WALL AND FLOOR TILE ADHESIVE

ARDEX X17

LOW VOC

ARDEX X17 is a white polymer fortified cement-based wall and floor tile adhesive that has been specially formulated with mastic type properties.

- Great workability with low sand content
- Extended open time
- Non slump - ideal for large format and heavy tiles

TILE TYPES

Fully vitrified and ceramic tiles, porcelain, natural stones (excluding moisture sensitive) and mosaics.

SUBSTRATES

- Concrete, renders, screeds
- Fibre-cement sheet, plasterboard on walls
- Compressed fibre-cement sheet on floors
- ARDEX liquid applied undertile waterproofing membranes
- Existing ceramic tiles (internal dry areas)

WALL AND FLOOR TILE ADHESIVE

ARDEX X7

LOW VOC

ARDEX X7 is a white cement based wall and floor tile adhesive.

- High performance thin bed mortar
- Improved workability
- Weather resistant
- Suitable for use over green bonded screed after 24 hours

TILE TYPES

Ceramic tiles, natural stone (excl. moisture sensitive), glass mosaics and porcelain.

SUBSTRATES

- Concrete, cement renders, screeds
- Fibre-cement sheet, plasterboard (mix with ARDEX E90)
- Heated slabs (mix with ARDEX E90)
- ARDEX/Undertile liquid applied waterproofing membranes (mix with ARDEX E90)
- Concrete swimming pools (mix with ARDEX E90)

EXTENDED COVERAGE FLEXIBLE NON SLUMP ULTRALIGHT TILE ADHESIVE

ARDEX X68 is a superior white polymer fortified cement-based wall and floor tile adhesive, that has been specially formulated to offer extended coverage.

- Has an extended open time, is non slump and flexible
- Environmentally sustainable sand free formula
- Ultralight formula, light to spread, light to move around

TILE TYPES

Fully vitrified, ceramic, porcelain, concrete stone tiles e.g. terrazzo, mosaics, natural stone (excluding moisture sensitive).

SUBSTRATES

- Concrete, renders, screeds
- Fibre-cement sheet, plasterboard walls
- Compressed Fibre Cement Sheet on floors
- Existing ceramic tiles (internal dry areas)
- ARDEX liquid applied undertile waterproofing membranes
- CTU (Ceramic Tile Underlay) over particleboard and plywood timber floors

MULTIPURPOSE ADHESIVE POWDER FOR WALL AND FLOOR TILES

ARDEX MPP is a white, flexible, wall and floor tile adhesive for internal applications. It combines the properties of a mastic adhesive with those of a fast setting cement-based adhesive.

- Fast setting – grout in 4 to 6 hours
- High bond strength
- Flexible – achieves S2 classification

TILE TYPES

Ceramic, fully vitrified, porcelain, mosaics, natural stone (excluding moisture sensitive).

SUBSTRATES

- Concrete, renders, screeds, aerated concrete
- Fibre-cement sheet, plasterboard walls
- Existing ceramic tiles (where glaze is removed)
- ARDEX undertile liquid applied waterproofing membranes

HIGHLY FLEXIBLE TILE ADHESIVE

A highly flexible tile adhesive that is also fast setting. This makes ARDEX X56 suitable for tiling directly to timber and over heated slabs.

- Highly flexible – achieves S2 classification, tile direct over timber
- Suitable for early age concrete/screeds
- High yield
- Fast setting – grout after 4 hours

TILE TYPES

Ceramic, fully vitrified, porcelain, mosaics, natural stone (excluding moisture sensitive).

SUBSTRATES

- Concrete, renders, screeds
- Internal timber (particleboard, plywood, mdf, cork) (priming required with ARDEX Optima or ARDEX P 82) with the exception of unbonded timber
- Fibre-cement sheet, plasterboard
- Compressed fibre-cement sheet
- Existing ceramic tiles (where glaze is removed)
- ARDEX undertile liquid applied waterproofing membranes

LOCATION

Internal, External (with adequate falls to waste)
(Not suitable for swimming pools to commercial floors subject to heavy traffic)

PREMIUM POLYMER MODIFIED FLEXIBLE TILE ADHESIVE

ARDEX ABAFLEX is a high performance, flexible, polymer modified cement-based tile adhesive. Especially suited to high performance situations.

- High performance – use in critical applications e.g. shopping centres
- Flexible – achieves S1 classification
- Fast drying – approx. 8 hours
- Use over early age concrete/screeds and renders

TILE TYPES

Porcelain, mosaics, fully vitrified, ceramic tiles, glass and porcelain mosaics, natural stone (excluding moisture sensitive).

SUBSTRATES

- Concrete, renders, screeds
- ARDEX liquid applied undertile waterproofing membranes
- Fibre-cement sheet, plasterboard walls
- Existing ceramic tiles (where glaze is removed)
- CTU (Ceramic Tile Underlay) over timber

ECONOMICAL FLEXIBLE RUBBER MODIFIED TILE ADHESIVE

ARDEX X52

LOW VOC

ARDEX X52 is an economical rubber modified cement-based adhesive for situations where minimal movement is anticipated.

- Use over early age screed
- Economical
- Flexible – achieves S1 classification
- Fast drying – grout after 6 to 8 hours

TILE TYPES

Porcelain, mosaics, fully vitrified, ceramic tiles and natural stone (excluding moisture sensitive stone and translucent tiles).

SUBSTRATES

- Concrete, renders, screeds
- Fibre-cement sheet, plasterboard walls
- Compressed fibre-cement sheet
- ARDEX undertile liquid applied waterproofing membranes (Not suitable for use directly over timber floors)

LOCATION

Internal, External (with satisfactory falls)
(Not suitable for continuous immersion applications e.g. swimming pools)

FLEXIBLE RUBBER MODIFIED WALL & FLOOR TILE ADHESIVE

ARDEX X44

ARDEX X44 Tropical Glue is a rubber modified wall and floor tile adhesive for fixing ceramic tiles in internal and external locations. Specially formulated for improved working and applications in tropical climates.

- Flexible
- Rubber modified
- High yield

TILE TYPES

Fully vitrified and ceramic tiles, natural stones (excluding moisture sensitive) and mosaics.

SUBSTRATES

- Concrete, renders, screeds
- Medium density fibre cement sheet
- Existing ceramic tiles (internal only)
- Plasterboard

MICROTEC LARGE FORMAT AND STONE TILE ADHESIVE

ARDEX S 28 neu

LOW VOC

MICROTEC
TECHNOLOGY

Rapid Hardening and Rapid Drying Large Format and Stone Tile Adhesive. ARDURAPID technology for installing natural stones and very large format tiles.

- Rapid drying – can be trafficked and grouted 3 hours after fixing
- Reduced risk of water staining, warping and curling
- Microtec technology improves adhesive strength

TILE TYPES

Fully vitrified and ceramic tiles, porcelain, concrete stone tiles.

SUBSTRATES

- Concrete, renders/screeds
- Medium density fibre cement sheets on walls and plasterboard sheet
- Existing ceramics
- Autoclaved aerated concrete (AAC)
- Compressed fibre-cement sheet on floors (with ARDEX E90)
- Heated Floors

LOCATION

QUICK SETTING TILE ADHESIVE

ARDEX QUICKBOND

LOW VOC

ARDEX Quickbond is a fast setting, polymer modified adhesive with extended pot life and workability.

- Fast setting – grout after 2.5 to 3 hours
- Good workability and pot life (approximately 45 minutes)

TILE TYPES

Ceramic tiles, mosaics, fully vitrified tiles, porcelain and natural stone.

SUBSTRATES

- Concrete, renders, screeds
- Internal existing ceramic tiles (mechanically remove the glaze)
- ARDEX undertile liquid applied waterproofing membranes (Mix with ARDEX Abalastic when using over heated slabs in external situations or when movement is anticipated)

LOCATION

Internal, External
(Not suitable for swimming pools)

TWO PART PREMIUM TILE ADHESIVE

ARDEX OPTIMA

LOW VOC

ARDEX Optima is a premium-grade two part adhesive with exceptional bond. Its unique formula enables ARDEX Optima to be used over a number of difficult to adhere to surfaces.

- Tenacious bonding – tile directly over existing tiles – no grinding back the glaze, no special primers for internal situations
- Highly water resistant
- High initial grab
- Highly flexible – achieves S2 classification

TILE TYPES

Ceramic, fully vitrified, porcelain, mosaics, natural stone (excluding moisture sensitive).

SUBSTRATES

- Rendered brick and blockwork
- Tilt up and pre cast concrete
- Concrete, renders, screeds, aerated concrete
- Fibre-cement sheet, plasterboard
- Directly over existing ceramic tiles
- Butynol® and ARDEX undertile liquid applied waterproofing membranes
- Powder coated cladding, galvanised steel
- Roughened fibreglass (not immersed applications)
- Particleboard timber/plywood

LOCATION

Internal, External
(Suitable for swimming pools and immersion applications)

Mini Kit: 1.7kg liquid, 5kg powder 10473
Large Kit: 10kg liquid, 6 x 5kg powder 8000029

CODE

TWO PART FLEXIBLE UNDERLAY/ADHESIVE FOR WALL & FLOOR TILE

ARDEX ISOFLEX

LOW VOC

ARDEX Isoflex is a two part, rubber based wall and floor tile adhesive. It is especially formulated to fix tiles over substrates subject to thermal and shrinkage movement.

- Highly flexible – achieves S2 classification
- 2:1 mixing ratio – easy to measure on site
- Tile directly to timber

TILE TYPES

Ceramic, fully vitrified, porcelain, mosaics, natural stone (excluding moisture sensitive).

SUBSTRATES

- Internal timber (particleboard, plywood, cork) (priming required with ARDEX Optima or ARDEX P 82) with the exception of unbonded timber. Contact ARDEX for oil rich timbers
- Concrete, renders, screeds, aerated concrete
- Fibre-cement sheet, plasterboard
- Internal existing ceramic tiles, where glaze is removed in dry areas
- ARDEX undertile liquid applied waterproofing membranes (excluding shower recess floors)

LOCATION

Internal, Covered External
(Not suitable for swimming pools or commercial floors subject to heavy traffic)

PREMIUM NON SLUMP WALL TILE ADHESIVE

ARDEX D2
LOW VOC

ARDEX D2 is a premium dispersion adhesive offering superior non slump and shear adhesion characteristics. Use in wet areas* without compromising adhesion strength over time.

- Superior non slump capability
- Excellent workability
- High flexibility
- Low odour
- Unique formulation for use in wet areas

TILE TYPES

Ceramic tiles, fully vitrified tiles, glass mosaics, porcelain and natural stone (excluding moisture sensitive stone).

SUBSTRATES

- Cement render, concrete walls
- Fibre-cement sheet, plasterboard walls
- ARDEX undertile liquid applied waterproofing membranes*
(*Not suitable for dense tiles over non-absorbent substrates such as waterproofing membranes due to prolonged drying times)

READY MIXED WALL TILE ADHESIVE

ARDEX D5
LOW VOC

ARDEX D5 is a white, ready mixed, thin bed, interior wall tile adhesive for fixing ceramic tiles, non-moisture sensitive natural stones and mosaics.

- Extended open time
- Smooth and viscous consistency that is easy to work and trowel
- ARDEX D5 is white – suitable for use with translucent tiles
- Accommodates limited building movement

TILE TYPES

Ceramic wall tiles, natural stone (excluding moisture sensitive stone) and glass mosaics.

SUBSTRATES

- Cement render, concrete walls
- Fibre-cement sheet, plasterboard walls
- ARDEX/Undertile liquid applied waterproofing membranes*

MULTIPURPOSE CONSTRUCTION ADHESIVE AND SEALANT

ARDEX CA 20 P
LOW VOC

ARDEX CA 20 P is a one component, silane modified polymer adhesive and neutral curing sealant which hardens in reaction with moisture. ARDEX CA 20 P is extremely flexible, with a high initial tack and good bond strength, making it suitable for a wide range of applications.

- Can be used underwater, ideal for minor short term repair applications
- Extremely versatile – Bonds a wide range of materials including metal, wood, ceramics and plastic
- Can be over painted

TILE TYPES

Various, plus a wide range of other materials

SUBSTRATES

Include concrete, wall panels, timber, waterproofing membranes, glazed and unglazed ceramic tiles, aluminium, plastics, metal, glass, fibreglass and polystyrene foam.

LOCATION

Internal, External
(Suitable for immersion applications where not exposed to chemically treated water)

TWO PART EPOXY ADHESIVE FOR NATURAL STONE

ARDEX WA 100
LOW VOC

ARDEX WA 100 is a high strength two part epoxy stone adhesive that exhibits superior bond strength. It is specially designed for fixing natural stone such as marble and granite, including those sensitive to moisture. It can also be used for the fixing and bedding of natural stone on walls, bench tops and stair risers.

- Smooth, easy to blend consistency
- Non slump capability
- Capable of withstanding shock and vibration movements
- Good chemical resistance – use in swimming pools

TILE TYPES

All types of natural stone, plus fully vitrified, ceramic and porcelain tiles.

SUBSTRATES

- Concrete, renders, screeds
- Medium density fibre-cement sheet, plasterboard
- Existing ceramic and stone tiles
- Autoclaved aerated concrete (AAC)
- Rendered brick and blockwork
- Internal timber

SILICONE FOR SANITARY INSTALLATIONS

ARDEX SE
LOW VOC

ARDEX SE is an acetic cure sealant for applications such as movement joints (between tiles), internal corners (tiled wall and floor) and connecting joints between tiled surface and benchtops, bath edges, cupboards, splashbacks.

- Flexible sealant (up to 25% movement)
- Waterproof – suitable for use in showers
- UV resistant – suitable for internal and external use
- Contains mould inhibitors
- Easy to use and smooth off

JOINT WIDTH

Max width 30mm, depth 15mm

SUITABILITY

ARDEX SE bonds well to ceramic tiles, glass, enamel, anodized aluminium, granite, porcelain, laminated bench tops and sanitary acrylics. (Not recommended for other natural stones, e.g. marble, travertine and limestones. May cause discoloration to brass and copper).

LOCATION

Internal, External
Use ARDEX SE as bond breaker when using with ARDEX waterproof membranes (Not suitable for continuous immersion use e.g. swimming pools)

SURFACES

NEUTRAL CURE AND NON STAINING NATURAL STONE SILICONE

ARDEX ST
LOW VOC

ARDEX ST is a unique, neutral curing silicone sealant with good adhesion properties yet is easy to apply and smooth. It is also characterised by its antifungal agents to combat mould growth and its non corrosive properties.

- Ideal for use with sensitive natural stones
- Use in immersed applications, such as swimming pools
- Contains mould inhibitors

JOINT WIDTH

Max. width 30mm, depth 15mm

SUITABILITY

ARDEX ST is ideal for moisture sensitive natural stone prone to staining, such as marble, gneiss, granite, sandstone and limestone. It can also be used on glazed and unglazed tiles, enamel, laminated kitchen benches, aluminium, concrete, glass, porcelain, waterproofing membranes, wood and sanitary acrylics.

LOCATION

Internal, External

SILICONE SMOOTHING AGENT

ARDEX SG
LOW VOC

ARDEX SG is a smoothing agent used with ARDEX silicone sealants. It prevents the silicone from sticking to tools and other surfaces, and helps to achieve smooth professionally finished silicone joints.

- Compatible with ARDEX silicone
- Improves application – ensures perfectly smooth silicone joints
- Assists clean up – prevents silicone adhering to tools and surfaces

SUITABILITY

Do not apply to joints that are yet to be filled with silicone as it will prevent adhesion. Avoid application on porous tiles and natural stones, as these may stain.

PACKAGING

500mL

CODE

10170

JOINT DESIGN

A Lasting Seal

The function of silicone is to accommodate movement and to do this it needs to expand and contract freely. Proper joint design will ensure the silicone provides a lasting seal.

Make sure:

- The silicone is bound on two sides, not all three
- Do not fill the joint, the thickness of the silicone should be half the joint width
- Maximum joint width is 30mm and thickness 15mm. Minimum is 5mm wide/5mm thick
- A backing rod at the base allows the silicone to move freely and is economical

CEMENT BASED GROUTS COVERAGE

Approximate coverage in kg/m². Coverage will vary according to the tile size, joint width and depth, as well as the method of application and on site conditions. Allow an additional 10–15% for wastage.

GENERAL CONSTRUCTION

MOISTURE-CURING EXPANSION JOINT SEALANT

ARDEX RA030 PLUS

ARDEX RA030 PLUS is a one-component, moisture curing, professional grade, elastomeric, polyether expansion joint sealant. It has excellent bond strength to most porous and non-porous substrates without the use of a primer. ARDEX RA 030 PLUS is non-sag and may be applied on vertical and horizontal surfaces.

- No bubble formation or foaming during installation on damp surfaces
- Excellent primerless adhesion to most substrates
- Excellent weathering and UV stability
- Movement capability: +/- 50% of joint width
- No Isocyanates, solvents, halogens or acids
- Can be painted over

**HYBRID POLYURETHANE
CRACK & SPALL REPAIR**

ARDEX RA 56

LOW VOC

ARDEX RA 56 is an ultra-low viscosity, 2-component hybrid polyurethane adhesive. It is a rapid curing concrete repair material used when minimal down time is crucial.

- Cures stronger than concrete
- Ultra Low Viscosity – Offers deep penetration into cracks
- Rapid cure – Trafficable in less than 20 minutes
- Ideal for spall repair when mixed with aggregate

LOCATION

**MULTI-PURPOSE EPOXY
REPAIR ADHESIVE**

ARDEX RA 88 PLUS

LOW VOC

ARDEX RA 88 PLUS is a two component, high performance ceramic blend epoxy. No-drip, non-sag, repair adhesive perfect for horizontal, vertical and overhead use (trowelable).

- Non-sag – Perfect for overhead and vertical repairs
- High strength – Stronger than concrete
- Trowelable and cure underwater
- Approved for use with potable (drinking) water – conforms with the requirements of AS4020.2005

LOCATION

It can also be used for repairing holes, spalls and cracks in concrete, repairing rotted wood, installing anchor bolts and repairing hand rails.

SUBSTRATES

Almost any material, including metal, concrete, brick, wood, stone, block and other substrates.

COVERAGE

Approx. 6 linear metres with a bead thickness of 6 x 6mm.

COLOURS

Grey

DRYING AND CURING

Open to full traffic in 2–3 hours, ready to receive paint in 2–3 hours.

**BONDING AGENT FOR USE WITH
SAND/CEMENT SCREEDS & RENDERS**

ARDEX ABACRETE

LOW VOC

ARDEX Abacrete is a bonding agent designed to improve shear and tensile bond strength of sand/cement screeds and renders.

- Liquid polymer additive improves bond strength and adhesion
- Improves water resistance
- Accommodates thermal movement

LOCATION

Internal, External

SUBSTRATES

- Concrete, renders, screeds
- Brickwork, blockwork
- Waterproofing membranes

IMPACT SOUND REDUCTION AND DECOUPLING SYSTEM

ARDEX DS 40
LOW VOC

ARDEX DS 40 is an acoustic mat designed to effectively reduce impact sound. ARDEX DS 40 can be installed onto various substrates prior to the direct application of tiles, slabs, natural stone and concrete pavers.

- Provides crack bridging function
- Pre-cut mats – simplify handling and installation
- Low build height – minimum of 4.5mm
- Tile over directly with ARDEX adhesives

SUBSTRATES

- Concrete, sand/cement screed
- Heated screeds
- Dry screed systems
- Wooden floors and wooden particleboard
- Old tiles and slabs

REMOVABLE/ DECOUPLING SYSTEM

ARDEX DS 60
LOW VOC

The ARDEX DS 60 De-coupling Mat which can be utilised as either a crack isolation mat system or a unique tiling solution. Ideal for situations which have the dual requirements of a hard wearing tile surface and a cost effective reinstatement of the original floor at the end of the lease period or upon refurbishment.

The system comprises of:

- DS 60 – Butynol® Decoupling Mat
- Recommended ARDEX Tile Adhesive

TILE TYPES

Ceramic, fully vitrified, porcelain, mosaics, natural stone (excluding moisture sensitive).

SUBSTRATES

Designed for use over domestic or commercial internal concrete and timber floors in dry areas.

FLOATING UNCOUPLING SYSTEM

ARDEX UI 720 FLEXBONE

ARDEX UI 720 FLEXBONE Floating Uncoupling System is a revolutionary, loose-laid floating system that provides 100% uncoupling. The system's separation from the underlying substrate results in significant time and cost savings through minimal substrate preparation.

- Unique bone shaped pattern
- GripLock Technology for the highest level of adhesive-to-sheet bond strength
- Highly durable, flexible plastic
- Laminated, topside glass fibre mesh that contains self-sticking overlaps for easy seam connection

FOR USE IN

- Offices
- Hotel Rooms
- Medical Offices
- Residential Properties
- Retail Shops
- Car Showrooms

SUBSTRATES

- Concrete substrates
- Timber subfloors
- Substrates with problem adhesion
- Mixed substrates made of different types of materials
- Vinyl floor coverings
- Oil contaminated floors
- Existing and cracked floors
- Painted floors
- Cutback adhesive
- Epoxy and polished coated floors

UNCOUPLING MEMBRANE

ARDEX UI 740 FLEXBONE

ARDEX UI 740 FLEXBONE Uncoupling Membrane is a high load-bearing, bonded uncoupling membrane ideal for large format tiles and stone in high traffic areas. The ARDEX UI 740 helps prevent grout joint and tile damage from movement and deflection.

- Unique bone shaped pattern
- GripLock Technology delivers outstanding tensile bond strength
- System helps neutralise underlying substrate movement and supports and distributes heavy loads from above
- Can be used as a waterproof layer in bathrooms and wet areas

FOR USE IN

- Shopping Centres
- Airports
- Residential Buildings
- Office Buildings
- Hospitals
- Car Showrooms

SUBSTRATES

- Concrete substrates
- Screeds (incl. green screeds)
- Timber subfloors
- Vinyl floor coverings
- Existing and cracked floors
- Fresh, slightly damp concrete

UNDERTILE LEVELLING COMPOUND

ARDEX LQ 92

LOW VOC

ARDEX LQ 92 is a cement-based underlay for levelling uneven concrete floors prior to tiling. Not recommended for use under vinyl coverings.

- Self smoothing
- Early walkability – tile over after approximately 4 hours
- Suitable for use with underfloor heating
- May be mixed with ARDEX Abalastic liquid when incorporating heating wires

BED THICKNESS

- 10mm down to feather edge
- For thicknesses over 10mm and up to 25mm, mix with 2mm – 5mm aggregate
- For ramping mix with up to 10kg of coarse dried sand to achieve a trowelable non-flowing screed

RAPID SET CEMENT SCREED

ARDEX A 48

LOW VOC

ARDEX A 48 is a rapid set cement screed preparation that has been designed for all types of floor coverings and is especially effective when installing moisture sensitive coverings. The rapid cure allows floor coverings to be installed quicker than regular screeds.

LOCATION

Internal and external

SUBSTRATES

ARDEX WPM 750 Undertile Butynol® waterproofing system, undertile waterproofing membranes, tiles, natural stones, terrazzo, resilient and textile floor coverings and parquet.

COVERAGE:

1m² at 10mm thickness per 20kg

THICKNESS

- Unbonded at least 35mm; and preferably 40mm thick. Maximum thickness is 70mm.
- Heated floors normally require greater than 45mm thick
- Bonded screed it must be at least 15mm and a maximum of 50mm

DRYING TIME

- Can be walked on and is ready to receive tiles after approximately 4 hours
- Ready for ARDEX Undertile Butynol® and smoothing cements after 24 hours
- Ready to receive ARDEX approved liquid undertile membranes, parquet, resilient and textile floor coverings after 48 hours

PACKAGING

20kg

13002

INDOOR WATER BASED ADHESIVE

ARDEX AF 171

LOW VOC

ARDEX AF 171 is a water based vinyl adhesive for internal use.

- Fast grab with very strong ultimate bond
- Excellent dimensional stability
- Excellent resistance to plasticiser migration

LOCATION

Internal

SUBSTRATES

- Hardboard underlayment board approved to AS 2458
- Cementitious underlayment
- Dry concrete where there is less than 80% RH when tested with in situ probe test

Contact ARDEX Technical Services for other substrates including terrazzo, ceramic tiles and metal substrates.

FLOOR COVERINGS

- Vinyl plank
- Wall sheet vinyl
- Sheet vinyl
- Linoleum
- Direct stick and double bond carpet installation
- Acoustic mat

COVERAGE

- Using a 1.6x1.6x1.6mm V-Notch trowel approximately 5.0m²/L
- Using a 0.8x1.6x0.8mm U-Notch trowel approximately 7.0m²/L

WORKING TIME

15–20 minutes

SET UP TIME

10–15 minutes

PACKAGING

15L pail containing 18kg of adhesive

PRESSURE SENSITIVE CARPET TILE ADHESIVE

ARDEX AF 271

LOW VOC

ARDEX AF 271 acrylic water based carpet tile adhesive for internal use free of hazardous organic solvents.

- Pressure sensitive adhesive for semi permanent (releasable) carpet tile and underlay installation
- Can be installed using a long nap roller or 1.6mm "V" notched trowel
- Excellent initial grab for permanent underlay and carpet tile installation

LOCATION

Internal

SUBSTRATES

ARDEX AF 271 is designed to bond carpet tile and carpet pad underlay onto:

- Hardboard underlay approved to AS 1859
- Concrete
- Timber
- Terrazzo

FLOOR COVERINGS

- Vinyl backed carpet tile
- Non-vinyl backed carpet tile for permanent application

COVERAGE

- Using short to medium nap roller approximately 8–10m²/L
- Using a 1.6x1.6x1.6mm V-Notch trowel approximately 5.0m²/L for the installation of VCT & textured backed carpet tiles and double bond underlays

WORKING TIME

Increased working time for semi-permanent carpet tile installation providing that the adhesive is not exposed to dust and other contaminants

SET UP TIME

15–30 minutes for semi-permanent carpet tile installation depending on site ambient conditions

PACKAGING

15L pail containing 18kg of adhesive

CODE

38565

LATEX LEVELLING COMPOUND

ARDITEX NA

LOW VOC

ARDITEX NA is formulated with excellent adhesion designed to work perfectly under a damp proof membrane. Also used to pre-level existing timber floors prior to the installation of timber sheeting for a stable base for new floor coverings.

LOCATION

- Internal and external
- Under damp proof membranes

SUBSTRATES

- New and existing concrete, ARDEX A38, ARDEX A48, timber floors.

Substrates with special requirements (Contact ARDEX Technical Services or view relevant Technical Bulletin online) - Moisture vulnerable concrete, terrazzo, quarry and ceramic tiles, concrete subfloors with electric under floor heating, existing epoxy coatings, lightweight autoclave concrete, primer treated metal.

FLOOR COVERINGS

- Linoleum, vinyl, carpet
- Ceramic and quarry tiles
- Floating timber

COVERAGE

12m² at 1mm, 4m² at 3mm

THICKNESS

- Feather edge to 12mm
- Bulkfill 12–30mm with 2–5mm aggregate

DRYING TIME

- Drying time is dependent on jobsite temperature, humidity, installation thickness and floor covering type. (Based on 23°C and 50% RH.)
- Walkable from 2 hours.
- Ready for Rubber, PVC Vinyl, Linoleum and wool textile floor coverings in 24 hours.

PACKAGING

Kit containing 20kg triple layer bag and 4.8kg ARDITEX latex pail

CODE

8000011

RAPID DRYING SMOOTHING COMPOUND

ARDEX FINE FINISH

LOW VOC

ARDEX FINE FINISH is a cement based smoothing compound designed to provide a smooth, permanent finish to a variety of internal substrates prior to the installation of floor coverings such as vinyl, carpet and ceramic tile. It is suitable for residential and light commercial applications only.

LOCATION

Internal dry applications

SUBSTRATES

New and existing concrete, terrazzo, quarry and ceramic tiles, timber floors and existing vinyl floors

FLOOR COVERINGS

- Linoleum, vinyl, carpet
- Ceramic and quarry tiles
- Floating timber

COVERAGE

Up to 70m² skim coat

THICKNESS

Feather edge to 3mm

DRYING TIME

Ready for floor coverings from 20 minutes

PACKAGING

10kg bag

CODE

19677

HIGH PERFORMANCE UNDERTILE WATERPROOFING MEMBRANE

ARDEX WPM 155 RAPID PLUS

(Undertile PU Acrylic Hybrid Membrane)

LOW VOC 

ARDEX WPM 155 Rapid Plus is a water-based polyurethane-acrylic hybrid waterproofing membrane developed for high performance undertile waterproofing.

- Express dry time with bathroom tiling possible in just 4 hours, with no risk to corners and junctions
- Crack Isolation protection over shrinkage, hairline and other non-structural cracks
- Tough flexible film
- Meets Green Building Council of Australia Greenstar requirements IEQ-13, IEQ-11
- Can be tiled over – good adhesion with ARDEX tile adhesives
- STB Tape eliminates need for bond breaker
- Class III Membrane, as per AS/NZS 4858 Wet Area Membranes

LOCATION

- Internal and external

SUBSTRATES

Concrete, engineered screeds, screeds compliant to AS 1884, fibre-cement sheeting, plasterboard and ARDEX cementitious smoothing and patch mortars used within the recommended systems.

COVERAGE

- Floors: 8.7m² (2 coats) D.F.T. – 1.0mm
- Walls: 17.5m² (2 coats) D.F.T. – 0.5mm

COLOURS

Blue

DRYING TIMES

- Recoat time: 1–2 hours

HIGH PERFORMANCE UNDERTILE WATERPROOFING MEMBRANE

ARDEX WPM 130 BUILDER'S EXPRESS

(Undertile PU Acrylic Hybrid Membrane)

LOW VOC 

Acrylic PU water-based waterproofing membrane developed for high performance undertile waterproofing.

- Tough flexible film
- Meets Green Building Council of Australia Greenstar requirements IEQ-13, IEQ-11
- Can be tiled over – good adhesion with ARDEX tile adhesives
- Excellent adhesion to a wide range of substrates
- Fast drying, 4 hours on decks and some applications
- Class III Membrane, as per AS/NZS 4858 Wet Area Membranes

LOCATION

- Internal and external

SUBSTRATES

- Concrete
- Renders and screeds
- Fibre-cement sheets
- Plywood

COVERAGE

This will vary with the porosity of the substrates. Two coats are recommended for optimum performance. A 20kg unit (15 Litres) will cover approximately 9m².

COLOURS

Light blue

DRYING TIMES

- Recoat time: 1–2 hours

TWO COMPONENT UNDERTILE WATERPROOFING MEMBRANE

ARDEX WPM 002

(Bathroom and Balcony Two Part)

LOW VOC 

ARDEX WPM 002 is a tough, rapid drying two component waterproofing membrane specifically designed for use under tiles.

- Rapid drying time – can be tiled over in 16–24 hrs
- Fibre reinforced – no need for reinforcing mat
- BRANZ Appraisal #701 for undertile waterproofing
- Green Star – meets the benchmark for VOC credit in the Green Building Council of Australia's Rating Tools

TYPICAL APPLICATIONS

Internal and external wet areas, balconies, decks, and other areas that will be tiled. Suitable for permanent immersion (when tiled over).

SUBSTRATES

Concrete, renders and screeds, fibre cement, plasterboard, plywood*

*Not recommended for external applications.

COVERAGE

- Floors: 16m² (2 coats) D.F.T. – 1.2mm
- Walls: 24m² (2 coats) D.F.T. – 0.8mm

COLOURS

- Liquid: White
- Powder: Off White

WATER BASED EPOXY MEMBRANE

ARDEX WPM 300

(HydrEpoxy 300)

LOW VOC

ARDEX WPM 300 is a two component water based epoxy polyamide membrane/ barrier coating.

- Can be applied to damp surfaces
- AS 4020:2000 Potable Water Approved
- Hydrostatic pressure resistant waterproof membrane
- Prevents rising damp and formation of efflorescence
- Water based – safe to use in sensitive locations
- Green Star – meets the benchmark for VOC credit in the Green Building Council of Australia's Rating Tools

TYPICAL APPLICATIONS

Low water vapour transmission coating and as a barrier/seal coating over freshly laid or damp concrete. Waterproofing barrier on the negative side in below grade surfaces such as basements, tunnels, liftwells, retaining walls and carparks. Waterproofing membrane or barrier coating over freshly laid hardened concrete, prior to the application of conventional levelling compounds carpet and tile adhesives.

SUBSTRATES

Brick, masonry, concrete block, concrete, stone and timber

COVERAGE

- Primer or efflorescence barrier: 60m²/20L kit, 12m²/4L kit (1 coat)
- Moisture barrier: 30m²/20L kit, 6m²/4L kit (2 coats)

COLOURS

Grey, Mojo Black

DRYING TIMES

- Recoat time: 4 hrs
- Full cure: 7 days

VOC CONTENT

26g/L

PACKAGING

4L kits

CODE

10207 (Grey), 10447 (Black)

SINGLE PART BARRIER MEMBRANE

ARDEX WPM 368

ARDEX WPM 368 is a single component acrylic copolymer moisture barrier that will prevent rising damp, efflorescence and will resist negative hydrostatic pressure when used in accordance with the technical data sheet.

- Can be applied to damp surfaces
- Can be safely applied to freshly laid hardened (green) concrete
- When applied directly to the substrate (dual coat system) the cured membrane will withstand 250kPa of hydrostatic pressure which is equivalent to a 25 metre head of water
- Prevents rising damp and the formation of efflorescence when used as a dual coat system

TYPICAL APPLICATIONS

It has excellent adhesion to most substrates including brick, masonry, concrete block, concrete, stone and is simple to use by brush, roller or airless spray machine.

SUBSTRATES

Brick, masonry, concrete block, concrete and stone

COVERAGE

- Water Stop: 45m² (1 coat)
- Waterproof membrane: 22.5m² (2 coats)

COLOURS

Grey

DRYING TIMES

- Recoat time: 2–4 hrs
- Full cure: 7 days

CATALYST SPRAY

ARDEX CATALYST SPRAY

ARDEX Catalyst Spray with the use of Speedtec technology is a clear solution which when applied to nominated ARDEX Adhesives accelerates the tack time for quicker installation of floor coverings.

LOCATION

Internal and external floors and walls

TYPICAL USES

ARDEX Catalyst Spray is designed to increase initial tack for adhesives with ARDEX Speedtec Technology. ARDEX Catalyst Spray also acts as an innate film formation for ARDEX WPM 179 – Single Component Rubber Membrane.

INSTALLATION

With the spray bottle, spray a fine mist evenly across the adhesive to one side only; as soon as this is complete install the following floor coverings to the treated adhesive.

PACKAGING

500ml spray bottle

CODE

16550

WELDABLE UNDERTILE WATERPROOFING MEMBRANE SYSTEM

ARDEX WPM 750

ARDEX WPM 750 Undertile is an undertile waterproofing sheet membrane system that is used in tiled areas such as showers and bathrooms.

The system provides a more secure system with consistent gauge thickness and heat welded laps that can be tank tested intermediately and tiled to directly.

- Sheet membrane for waterproofing tiled areas
- Tiling can begin 60 minutes after membrane installation
- Thin & consistent waterproofing gauge
- Heat weld corners and laps
- Available with a unique clamp waste outlet

TYPICAL USES

It is used for waterproofing tiled areas such as showers and bathrooms.
