PREMIUM PERFORMANCE

INSTALLING VINYL OVER CERAMIC TILES

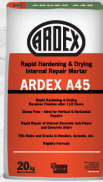

3

2

1

1. SUBSTRATE PREPARATION

The existing floor tiles must be sound and well secured to the substrate. Any loose, broken or drummy tiles should be removed and the void filled with:

ARDEX A45

Rapid Hardening & Drying Repair Mortar for internal repairs and dormant cracks

The cleaned surface is to be mechanically prepared to provide a clean 'keyed' surface. Mechanical preparation is advised for the floor levelling products but is not required if Feather Finish is to be used.

Prime ceramic tile/terrazzo with:

ARDEX P9

Single Part Primer for Smooth and Dense Surfaces

Make sure that excess primer does not accumulate in the tile grout lines.

2. INSTALL SMOOTHING/SELF LEVELLING

ARDEX FINE FINISH

Smoothing for thicknesses 1.5 - 3mm

ARDEX FEATHER FINISH

Rapid drying smoothing for thicknesses 1.5 - 3mm

ARDEX K 120

Economic levelling for thicknesses 2.5 - 12mm

ARDEX K220

Low odour levelling for thicknesses 2 - 20mm

ARDEX K12 NEW

Super smooth levelling for thicknesses 1.5 - 35mm

ARDEX K10 REACTIV8

Long open time levelling for thicknesses 1.5 - 15mm

ARDEX K15

Fibre reinforced levelling for thicknesses 1.5 - any depth

ARDEX K55

Rapid drying levelling for thicknesses 1.5mm - any depth

ARDEX ARDITEX NA

Flexible levelling for thicknesses 1.5

3. ADHESIVE FIX VINYL

ARDEX AF 142

Fast grab vinyl adhesive

ARDEX AF 180 MS

Heavy duty adhesive for areas with direct sunlight and moisture

Refer to the most current product datasheet and/or technical bulletin at www.ardexaustralia.com for installation instruction
